

THE STANDARD

Media Pack 2021

ABOUT US

The Standard is a quarterly online magazine, owned and created by the British Damage Management Association (BDMA), an organisation committed to bridging relations between the insurance and damage management industries.

We are dedicated to leading industry best practice and establishing quality standards across the damage management supply chain. Our commitment is brought to life through The Standard.

Established in 2018, The Standard's mission is to bring into focus the interests of practitioners and members working in the damage management industry, by offering industry training and education insight, sharing advice on standards and representing the specialised work and skills of professionals working within this sector.

For a full breakdown of the content and our themes for 2021, please refer to our editorial calendar.

We look forward to working with you in 2021.

CALL FOR CONTRIBUTIONS

The Standard is written in collaboration with our members, showcasing industry thought leaders and success stories to the wider community.

We are delighted to present the opportunity for our members to broadcast their expertise to the broader insurance industry by submitting opinion pieces and case studies for inclusion in The Standard. Opinion pieces provide a platform for members to demonstrate their thought leadership insight within the industry. Meanwhile, case studies are a brilliant opportunity to profile specific examples of how your business adds value to the supply chain.

If you would like to submit a thought leadership article or case study for editorial consideration, please contact Helen Bell via: helen.bell@realia.co

OUR AUDIENCE

The Standard's content aims to inform, entertain and inspire damage management and insurance professionals of the BDMA community.

By working with The Standard, your business will reach key decision makers within insurance and damage management. We will help to raise your brand awareness, exposure and opportunities to collaborate.

The magazine is specifically targeted at all professionals interested and working in the damage management and insurance industry, such as loss adjusters, brokers, suppliers, facilities managers, local authorities, individual practitioners and technicians, and official bodies.
